

AFFIDAVIT

I, John Doe, being first duly sworn, depose and say:

1. I am over the age of 18, a resident of REDACTED, Rhode Island, and I have personal knowledge of the facts herein.
2. On Tuesday June 11, 2019, in the late morning and early afternoon, during the incident which I describe in this Affidavit, I was standing on the sidewalk by the driveway entrance to the Planned Parenthood abortion center located at 175 Broad Street, Providence, RI 02903.
3. At approximately 12:45 pm, I heard sirens, and all of a sudden a fire engine pulled up next to where I was standing and parked on the street by the driveway to the Planned Parenthood abortion center. Four individuals, who were dressed in EMT-type uniforms and carrying emergency-type equipment, exited the fire engine and walked towards the Planned Parenthood abortion center building. After about 20 minutes later, I saw them return to the driveway area where I was located, walk back to the fire engine, get in the vehicle and leave.
4. At virtually the same time that the fire engine arrived, a red Providence Rescue ambulance pulled in the same Planned Parenthood abortion center driveway, and they drove to the back employee entrance to the Planned Parenthood abortion center. Two EMT-type uniformed men walked into the building. I don't recall whether or not they wheeled a gurney into the building. Sometime later (approximately 15-20 minutes), the two EMT-type uniformed men rolled a patient (a young African American woman) lying down on a gurney, from the Planned Parenthood abortion center to the awaiting ambulance, loaded her into the vehicle, they got back into the vehicle (one in the back with the patient), and drove to the exit of the parking lot. The ambulance then waited at the driveway entrance until the traffic cleared sufficiently for it to cross the street, taking a left, and enter the traffic in the direction of the nearest hospitals.
5. Soon after I became aware that an emergency situation was occurring at the Planned Parenthood abortion center, I began filming the events unfolding outside the abortion center, including the coming and going of the two emergency vehicles and their respective emergency personnel.
6. When I got home that afternoon and looked at the footage, I noticed that the date stamp was incorrect, because this event happened Tuesday, June 11, 2019. I also noticed that the time stamp was incorrect, but that's obvious, because they scenes filmed clearly occurred in the daytime and not at 8:30 at night. Records kept by both emergency crews will readily confirm the facts as I have described them. I had never set up the camera with the right date and time - I had just opened it up and started using it.

Further Affiant saith not.

/s/ John Doe
